Profile

Full Stack & AI Enthusiast Developer

Motivated developer with experience in building responsive web applications using HTML, CSS, JavaScript, React, and Bootstrap. Skilled in backend development using Python (Fast API) with MongoDB for database management. Familiar with FAST API development and full-stack integration. Currently exploring AI concepts in Python, with foundational understanding of libraries such as NumPy and pandas. Interested in applying machine learning and AI tools to enhance web applications and build intelligent. Strong problem-solving mindset with a focus on continuous learning and building practical, scalable projects.

Technical Skills

Full Stack Development

- Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Design
- Backend: Python (Fast API), PHP (Laravel)
- Database: MongoDB
- API Development: Fast API (RESTful APIs, JSON)
- Version Control: Git & GitHub
- Tools: VS Code

Artificial Intelligence & Automation

- AI Platforms: Vapi (Voice AI)
- Workflow Automation: n8n
- Voice Technologies: Speech-to-Text, Text-to-Speech, Natural Language Processing

Education

THE EDUCATORS

Secondary Education
Punjab Group of Colleges
Secondary Education

2018-2020 | Faisalabad, Pakistan
2021-2023 | Faisalabad, Pakistan Higher

COMSATS University Islamabad
Bachelor of Science in Computer Science

2023 – Present | Sahiwal, Pakistan

Projects

Mian & Sons Hardware Store

- Full-Stack website | ReactJS, Fast API, MongoDB
- Building an end-to-end digital system with admin panel and online storefront for a hardware business.
- Developed UI for inventory, sales, and customer management with real product data.
- Integrated secure authentication and real-time database connectivity via FAST APIs.

VOICE APPOINTMENT BOOKING

- Developed AI-powered voice booking system using Vapi for natural language interaction and n8n for workflow automation
- Automated appointment scheduling with Google Calendar integration and email confirmations via Gmail API
- Built conversational interface enabling hands-free appointment booking through voice commands
- Designed scalable workflows in n8n to validate availability and trigger calendar events automatically

Hugging Face Multimodal App

- Created multimodal AI application using Hugging Face models for image analysis and text-to-speech functionality
- Integrated vision and language processing to analyze images, generate descriptive paragraphs, and provide voice output
- Built interactive interface with Stream lit for real-time AI-powered image Q&A and audio responses

Object Detection System

- Implemented real-time object detection using Hugging Face pre-trained models and computer vision techniques
- Developed camera-based detection system for identifying and classifying objects with Python • Applied deep learning models for accurate object recognition and bounding box visualization

Restaurant Order System

- Built full-stack restaurant management application using Java and JDBC for database connectivity
- Designed order processing system with menu management, order tracking, and billing functionality
- Implemented database operations for efficient CRUD operations and transaction management

BITESPOT Food Ordering Website

- Created dynamic food ordering platform using PHP with MySQL database integration
- Implemented user authentication and session management for secure ordering
- Built restaurant menu system with cart functionality and order management features

Vehicle Monitoring System

- Built vehicle tracking and monitoring solution for fleet management
- Implemented real-time data processing for vehicle location and status updates
- Designed monitoring dashboard for tracking vehicle performance and analytics

Languages

Programming Languages

- JavaScript (ES6+)
- Python
- C++
- Java
- C

Web Technologies & Framework

- React.js
- HTML5, CSS3
- Bootstrap
- Fast API (Python)

Databases

- MongoDB
- MySQL

Certifications

- NAVTTC Python AI
- NAVTTC Canva Designing
