Profile

Full Stack & Mobile App Developer

Dynamic developer with hands-on experience in building cross-platform mobile applications using React Native and responsive web applications using React.js, HTML, CSS, and Bootstrap. Skilled in architecting robust backend solutions using Python (Fast API) and managing databases with MongoDB. Passionate about delivering seamless, user-centric end-to-end applications. Possesses a strong problem-solving mindset with a focus on writing clean code, continuous learning, and building scalable digital solutions.

Technical Skills

Full Stack Development

• Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Design
• Backend: Python (Fast API), PHP (Laravel)
• Database: MongoDB
• API Development: Fast API (RESTful APIs, JSON)
• Version Control: Git & GitHub
• Tools: VS Code

Mobile App Development

- **Frameworks:** React Native, Flutter
- **Languages:** JavaScript (ES6+), Dart
- **Tools & Ecosystem:** Expo, Metro Bundler, Cross-platform UI Design

Experience

Mobile Development Intern (React Native)

VIBERAYTECH | July 1st, 2026 –August 31, 2026 | Rawalpindi/Onsite

- Built an AI-powered **Reverse Image Search app** incorporating multi-engine image identification, camera/gallery integration, and computerized usage limit tracking
- Expanded a high-performance **Duplicate File Remover app** featuring custom Java native modules, multi-format media scanning, Scoped Storage permission handling, and mechanized storage cleanup.
- Built a comprehensive **Software Update & Device Diagnostic app** incorporating systematized app version scanning, bulk uninstaller, OS update detection, and an AI-powered device assistant

Mobile App Developer (Part-Time | Remote)
Viberay Tech | Rawalpindi, Pakistan September 2026 – Present

- Developing and maintaining cross-platform mobile applications using React Native and JavaScript.
- Building responsive, reusable UI components and implementing application features.
- Integrating REST APIs and managing application navigation, state, and data handling.
- Debugging, testing, and optimizing applications for improved performance and user experience.
- Collaborating remotely with the development team to deliver mobile application projects.

Projects

Pill Remainder App

- React Native, JavaScript, Notifee, MMKV, React Navigation.
- Built a smart offline pill reminder app to schedule doses, track prescriptions, and monitor adherence.
- Constructed an exact-trigger alarm scheduling engine using Notifee with customizable snooze intervals,
- Applied high-speed local persistence using MMKV, health trends & streak tracking.

Tiff Image Converter App

- React Native, JavaScript, UTIF, RNFS, React Navigation, i18next, Lottie
- Built an offline multi-page TIFF viewer and converter to render, inspect, and export images.
- Created a batch conversion engine exporting TIFF files to JPG, PNG, WEBP, and PDF

Zip Archiver App

- React Native, JavaScript, React Native Zip Archive, Context API, Async Storage, RNFS, Lottie
- Built an offline archive manager to create, extract, and manage compressed files
- Designed a 15-level deep storage scanner categorizing media, docs, and APKs while filtering cache.
- Executed AES-256 encrypted zip compression, real-time media indexing, history tracking.

Invoice Maker App

- React Native, JavaScript, Context API, Async Storage, HTML-to-PDF
- Built an invoicing and billing app for businesses to create, track, and manage commercial invoices.
- Developed UI for client and business, tax & discount calculations, invoice preview, and recycle bin
- Implemented a HTML-to-PDF rendering engine, printing, sharing, and multi-language (i18n) support.

Software Update & Device Diagnostic App

- Cross-Platform Mobile App | React Native, JavaScript, Android Native APIs, Async Storage
- Built a utility app for hardware diagnostics, OS verification, and update scanning.
- Developed UI for bulk uninstalls, security audits, storage analytics, and sensor tests.
- Unified an AI troubleshooting assistant with multi-language (i18n) support.

Reverse Image Search App

- AI Mobile Application | React Native, Vision AI APIs, REST APIs, JavaScript
- Built an AI-powered visual identification app for multi-engine reverse image searching.
- Designed a responsive UI with camera/gallery integration, image cropping, and engine selection.
- Integrated REST APIs featuring automated usage tracking, caching, and secure data handling.

Duplicate File Remover App

- Android Utility App | React Native, Native Java Modules, Android APIs
- Built a high-performance system to scan, group, and safely remove duplicate media and documents.
- Enhanced file-hashing and metadata algorithms for instant duplicate detection without UI lag.
- Blended custom Android Native Java modules to bypass Scoped Storage limitations.

Car Showroom ERP System

- Full-Stack Dealership Management Platform | React, Fast API, PostgreSQL, Tailwind CSS, Recharts
- Architected an enterprise platform to manage vehicle inventory, sales, consignments, and installment.
- Improved async REST APIs using Fast API and SQL Alchemy for role-based auth and backups.
- Merged dynamic financial dashboards to track real-time revenue, investor payouts, and expenses.

Mian & Sons Hardware Store

- Full-Stack website | ReactJS, Fast API, MongoDB
- Building an end-to-end digital system with admin panel and online storefront for a hardware business.
- Expanded UI for inventory, sales, and customer management with real product data.
- Incorporated secure authentication and real-time database connectivity via FAST APIs.

Restaurant Order System

- Built full-stack restaurant management application using Java and JDBC for database connectivity
- Created order processing system with menu management, order tracking, and billing functionality
- Enforced database operations for efficient CRUD operations and transaction management

BITESPOT Food Ordering Website

- Initiated dynamic food ordering platform using PHP with MySQL database integration
- Enforced user authentication and session management for secure ordering
- Built restaurant menu system with cart functionality and order management features

Education

THE EDUCATORS
Secondary Education — **2018-2020 | Faisalabad, Pakistan**

Punjab Group of Colleges — **2021-2023 | Faisalabad, Pakistan**
Higher Secondary Education

COMSATS University Islamabad — **2023 – Present | Sahiwal, Pakistan**
Bachelor of Science in Computer Science

Languages

Programming Languages
• JavaScript (ES6+)
• Python
• C++
• Java
• Dart

Web & Mob Technologies
• React Native
• Flutter & Expo
• React.js
• HTML5, CSS3
• Fast API (Python)
• Node.js & Laravel (PHP)

Databases
• MongoDB
• MySQL
• PostgreSQL

Certifications

- NAVTTC Python AI
- NAVTTC Canva Designing
